

“Dingy one day, like a Lamborghini showroom the next,” says proud car enthusiast

PROBLEM: A dirty, dusty, dull garage floor that is hard to keep clean and is not in keeping with the quality finishes adjoining it.

SOLUTION: Correctly prepare and install a bright new Dynamic Flooring Australia finish in the client’s chosen colour of “sandstone”.

CONSTRAINTS: Minimise downtime and disruption to residents. No “smelly” coatings to be used because living areas adjoin the garage.

MATERIAL: Dynamic Flooring Australia’s 100 per cent solids two-part epoxy finish, which boasts:

- chemical resistance
- anti-slip finish
- no solvents
- easy cleaning
- wide colour range availability

METHOD: Dry planetary-head vacuum diamond grind to remove old paint. Repair damage to surface using two-part epoxy mortar. Apply two coats of 100 per cent solids two-part epoxy finish.

RESULT: A tough, clean, bright floor finish that is resistant to chemicals and easy to maintain. Highly reflective, the floor also lessens the lighting needed. And oil or fuel spills simply wipe clean.

MORAL: To enhance the aesthetics of what is often the front door to your home or apartment and to make life easy with a low maintenance, industrial strength, bright new finish, a “Dynamic Flooring Australia floor should be behind your garage door”.

Achieved: Suburban garage now looks more like a showroom than a dungeon for cars.

Client: A resident who loves his cars too much to house them in an ugly space.

Place : Lindfield, NSW.

Material: Heavy duty 100% solids epoxy.

A Lindfield resident sick of having a “dungeon for his cars” had Dynamic Flooring Australia turn his garage into a showroom to rival a Lamborghini dealership’s

“Your business travels on its floors”
